FBA Restock Planner

Quick-Start Guide — Your First 5 Minutes

VERSION 3.0

Welcome! This guide gets you from download to your first shipment recommendation in under 5 minutes.

The planner is pre-loaded with demo data — you can see it working before touching a single cell.

→ THE 7-STEP WORKFLOW

1 **STEP 1 → Download Amazon Report**
Seller Central → Reports → Fulfillment → Inventory → FBA Inventory Replenishment Report → Download CSV

2 **STEP 2 → Paste Your Data**
Open the CSV → Select All (Ctrl+A) → Copy → In the planner go to Paste_Amazon_Report tab → Click A6 → Paste

3 **STEP 3 → Configure Your Products**
In Product_Setup, add Case Pack, Status, Cost, Selling Price, and Supplier for each SKU you sell

4 **STEP 4 → Check Settings**
In Settings, verify Target Coverage Days, Lead Time, Buffer, and Growth Multiplier. Update if needed.

5 **STEP 5 → Add Promo Events**
In Promo_Calendar, set Active = Yes for Prime Day, BFCM, or any upcoming demand spike

6 **STEP 6 → Read the Dashboard**
Dashboard shows KPI cards at top. Red = urgent reorder. Yellow = watch. Green = healthy.

7 **STEP 7 → Export Your Shipment**
Go to Shipment_Export — all SKUs with recommended quantities appear ready to copy into Amazon

■ COLOR GUIDE — What Each Color Means

GREEN cells
Your input — fill these in

GRAY cells
Formula calculated — do not edit

TEAL cells
Auto-pulled from your Amazon paste

DARK cells
Calculated output — read only

■ RISK LEVELS — What They Mean

■ URGENT	Days Cover < Lead Time. May already be too late — order immediately.
■ WATCH	Days Cover < Target Coverage. Order soon to avoid stockout.
■ HEALTHY	Days Cover ≥ Target Coverage. No action needed right now.
■ HOLD	Status = Hold in Product_Setup. Excluded from all calculations.

FBA Restock Planner

Quick-Start Guide — Your First 5 Minutes

VERSION 3.0

■ KEY SETTINGS TO KNOW

Target Coverage Days	**42 days**	How many days of stock you want AFTER shipment arrives at FBA
Default Lead Time	**21 days**	Total days: supplier production + transit + Amazon receiving
Default Buffer	**14 days**	Extra safety cushion on top of lead time for delays
Sales Velocity Method	**Weighted Blend**	How daily sales are calculated: 40% 30D + 30% 60D + 20% 90D + 10% 7D
Growth Multiplier	**1.15 = +15%**	Scales up velocity to account for expected growth
Round to Case Pack	**Yes / No**	Yes = rec qty always rounds up to nearest full supplier carton
Amazon Max Inventory	**Leave blank**	Set only if Amazon has imposed a restock limit on your account

■ APPS SCRIPT — Unlock Extra Power (Google Sheets)

Install the Apps Script included in your download for these menu features:

- Sort Planner by Risk — Urgent first
- Import Amazon CSV from Drive
- Backup to Drive
- Refresh Shipment Export tab
- Export Planner to CSV
- Email Urgent SKU alert

To install: Extensions → Apps Script → paste script → Save → Run → onOpen → grant permission

? COMMON QUESTIONS

Q: How do I clear the demo data?
A: In Paste_Amazon_Report, delete rows 6–15. In Product_Setup, delete rows 5–14. Then paste your own data.

Q: What if Amazon changes their CSV format?
A: The planner finds columns by header name (not fixed column letters), so it still works even if Amazon rearranges their export.

Q: Why does my planner show Urgent for everything?
A: Check that Today's date in Settings B27 shows =TODAY(). Also verify your Paste tab has data starting at row 6.

Q: Can I add more than 10 SKUs?
A: Yes — add rows in Product_Setup and Paste_Amazon_Report. The planner supports up to 100 SKUs (extend formulas in Restock_Planner by dragging down).

Q: How do I get updates?
A: Re-download from your Etsy purchase page. All updates are free for buyers. Check the Changelog tab for what's new.

Q: Can I use this in Excel instead of Google Sheets?
A: Yes — all formulas are compatible with Excel. The Apps Script only works in Google Sheets.
